流動図

The flow diagram illustrates the pedestrian route from the station to the building. The top view shows a path starting from the station (left) and moving towards the building (right). The path is defined by two horizontal lines, with a width of 8.5m at the top and 8.4m at the bottom. The side view shows the path's vertical profile, with a height of 9.2m. A compass rose indicates that North is oriented upwards.

備考: PO はAプロのみ設定。
