流動図

The flow diagram illustrates the pedestrian movement from the station to the building. It includes a north arrow, a scale bar (0-100m), and three detailed diagrams of the crossing area. The first diagram shows a 14.9m wide crossing with two pedestrian lights. The second diagram shows an 8.9m wide crossing with two pedestrian lights. The third diagram shows an 8.2m wide crossing with two pedestrian lights. The flow is from the station (bottom) towards the building (top).
